The Ojai Valley Green Coalition Board of Directors present at its April 4, 2013 regular meeting unanimously agreed to endorse the Casitas Municipal Water District in its efforts to acquire the Golden State Water Company.

The Coalition recognizes that water is one of our most precious natural resources and an inalienable human right to have equity in access and cost. As such water should be held in the public domain and not privatized.

Specifically to our community and mission, the business model of the Golden State Water Company does not incentivize water conservation and efficiency, and is therefore counterproductive and even detrimental to the Ojai Valley's residents and businesses need to reduce water usage and reclaim our water to the extent possible.

Respectfully submitted,

Marleen Luckman
President

Deborah Pendrey
Executive Director
