Golden State Water increased its rates to more than double our costs, because it is now a race to see how high and how outrageous the bill will be. You will be receiving a bill in your mailbox every month that is filled with questionable upgrades. You will pay for these upgrades every month, not just the return on 8 to 10 percent of profits. The Golden State Water has spent $1 million to upgrade the system. The majority of the projects that will not improve your water, but will increase the smell of our water. Those investors, those executives, those investors with exceptionally high rates of profit. Too massive an increase to leave the highest taxed of all districts, it will create an unsustainable debt that will take our children and grandchildren to pay off those debt.

GSW is the biggest waster of water in California. 27% of all the water in Ojai is wasted, it is a judging law judge. Only Clear Lake and two months.  You would think we would have a right to representation. Financial assessment. Financial statement. Independent assessment. Independent evaluation, left side bottom para.

**Eagles set for exciting year**

**Gunn shoots ’em straight in Front Nine**

Of all the different types of golf tournaments the Front Nine Golf Club plays, none is more worrisome for players than the “Three Clubs and a Putter” version. Players choose to play the front nine at Soule Park with only three clubs of their choice. Some players take their driver; others need a long club also in the midfield. Some bring their sand wedge, others need their pitching wedge for more shots and pray they don’t land in the sand.

Mimi Duque, the league’s creator, loves this format. “It challenges you to focus on course management. This also may be a chance to practice the clubs that have been giving you problems, or maybe your favorites and will confirm your confidence,” she said.

Some players confidence was frayed when, at the last minute, the group was told to tee off on the back nine.
